

The goal of the graduate certificates is to enable students to explore graduate programs, provide a strong foundation for future study that results in a graduate degree, and/or provide the skills necessary to transition to a new field of work. The credits earned in these graduate certificate programs satisfy the requirements for entry into the graduate programs offered by our department.

Admission requirements

Students seeking admission must [submit an application with the Graduate School](#).

Accelerated programs requirements

The requirements for these programs are available in the university catalog:

- [Intelligent Systems](#)
- [Software Engineering](#)
