Compressed Air & Refrigerated Spaces

energy saving opportunities

Keith Goossen
University of Delaware

**Center for Sustainable Energy and
Environmental Engineering**

presents

The performance of energy audits at industrial sites will be presented, with the usual major systems considered and typical recommendations. Lately, there has been some changes in compressed air that impacts those recommendations, that will be discussed. Also, the results of audits for refrigerated spaces, particularly the operation of evaporators, will be presented. This webinar is sponsored in part by the EPA's Pollution Prevention Program.
