Mechanical Design Tech Concentration
Bachelor of Science in Industrial Technology
AAS Degree Completion Program

Description of Program
The Bachelor of Science in Industrial Technology (BSIT) is a degree completion curriculum designed for students who hold a qualifying Associate in Applied Science degree (AAS) in an industrial or technology related field. The BSIT Mechanical Design Technology concentration is offered only on main campus during the daytime (not an online option).

The BSIT Mechanical Design Technology Concentration emphasizes application of state-of-the-art software, digitizing, and product realization/development equipment. Graduates have the opportunity to work as design professionals or as members of a design team. Many graduates progress to supervise a design team or manage a design project. Graduates meet nationally recognized standards in demonstrating knowledge and skills in applying design practices and drafting concepts to solve a broad and varied range of design problems. Professional opportunities upon graduation are found in a range of engineering and architecture related disciplines.

This option prepares individuals to apply basic engineering principles and technical skills in support of engineers engaged in the design and development phases of a wide variety of projects involving mechanical systems. It includes instruction in principles of mechanics, applications to specific engineering systems, design testing procedures, prototype and operational testing and inspection procedures, manufacturing system-testing procedures, test equipment operation and maintenance, and report preparation.

Program requirements
- Completed a qualifying associate of applied science degree program.
- Apply up to 60 semester hours of the 120 required from a regional accredited community college or technical institute.
- At least 60 semester hours of the 120 required semester hours must be completed at four-year regional accredited colleges or universities.
- At least 33 semester hours of major coursework must be completed at ECU.
- Only courses with a ‘C-’ or better will transfer.
- Total 120 hours required for this degree.

Industrial Technology Degree Requirements

Industrial Technology Major Coursework (42 hours)
- Technical Writing
- Technology Project Management
- Cost and Capital Analysis
- Industrial Supervision
- Introduction to Statistical Process Control
- Engineering Graphics II with Lab
- Rapid Prototyping with Lab
- Jig and Fixture Design with Lab
- Geometric Dimensioning & Tolerancing with Lab
- Machine and Tool Design with Lab
- Computer Numerical Control with Lab
- Robotics in Computer Integrated Manufacturing with Lab
- Plant Layout and Materials Handling
- Approve Technical Elective

Courses to transfer or taken at ECU (84 hours)

AAS Technical courses (38 hrs)  Math (3 hrs)
English (6 hours)                College Algebra
Composition I                   Humanities & Fine Arts (9 hrs)
Composition II
Health & Exercise (2, 1 hours)  At least one in Humanities
General Ed Elective (3 hours)   At least one in Fine Art
Natural Science (7 hours)        Humanities/Fine Art to total 9 hrs
* College Physics 1 with lab     Social Science (9 hours)
Natural Science elective         Principles of Microeconomics
*highly recommended as one of the Introductory Psychology
natural sciences electives.     Personnel & Industrial Psychology
