

SGT. David James Smith, United States Marine, Memorial Leadership Scholarship

The David J. Smith Leadership award was established in 2010 to honor David Smith, a fallen Marine and proud Pirate. David was killed in action while in combat operations in Afghanistan in January of 2010. As a rising senior at East Carolina University, David pursued a degree in Industrial Distribution and Logistics with an anticipated graduation in 2011.

While a student at ECU, David embodied the school motto of “servire” by remaining active in the community and serving in the Marine Corps as a Sergeant. David was very proud to be a member of the ECU family and demonstrated exceptional patriotism for his country. His leadership, integrity, and service in the community and to ECU inspired the College of Engineering and Technology to award a scholarship in David’s name to a student Pirate in the College who best exemplifies these traits.

This College of Engineering and Technology scholarship is awarded to a full-time student with a minimum 2.7 GPA with demonstrated leadership and service.

The Keihin Carolina Systems Technology Scholarship

This College of Engineering and Technology scholarship is awarded to a full-time student (rising junior or senior) with a minimum 2.75 GPA. Preference given to students from counties located east of I-95.

The Keihin College of Engineering and Technology Development Fund Scholarship

This College of Engineering and Technology scholarship is awarded to a full-time student with a minimum 2.75 GPA. Preference given to students from counties located east of I-95 that started their education at Edgecombe Community College.

The Noah Dombkowski Memorial Scholarship

This scholarship will be awarded to a student with a self-identified visible or invisible physical or mental disability with a demonstrated commitment to overcome and succeed in spite of the disability. First preference is for a student pursuing a degree in the Industrial Engineering Program. Second preference is for a student within the College of Engineering and Technology. However, if no student is identified, this scholarship can be awarded to a student from another college at East Carolina University. University Scholarships manages the awarding of this scholarship.

The Robert and Betty Hill Scholarship (Funded through CET Scholarship Fund)

This scholarship will be awarded to a student pursuing a degree withing Technology Systems, Computer Science, or Construction Management. This is a renewable, need based scholarship.
